PHINA TSHEGOFATSO SELAHLE

Software Developer
Centurion, Gauteng | +27 66 206 7648 | ptselahle@gmail.com
github.com/Tshego1108 | LinkedIn: /in/tshegofatso-selahle | Portfolio: tshego1108.github.io

PROFESSIONAL SUMMARY

BSc graduate in Mathematical Sciences (Computer Science and Statistics, University of Limpopo) with hands-on software development experience across full-stack and AI-assisted applications. Currently building BizOps AI, an enterprise-grade AI business operations platform, using Angular, ASP.NET Core/.NET, SQL Server and a Python Flask microservice with scikit-learn and OpenAI. Proficient in Python, C++, JavaScript and SQL, with a track record of shipping complete, documented projects from architecture through deployment. Seeking a Software Developer / Junior Software Engineer role to apply strong analytical foundations and practical engineering skills to production systems.

TECHNICAL SKILLS

- **Languages:** Python, C++, Java, JavaScript, SQL, HTML, CSS
- **Frameworks & Libraries:** Angular 18, ASP.NET Core (.NET 8), Entity Framework Core, Flask, React, scikit-learn
- **Databases:** Microsoft SQL Server, MySQL
- **AI / ML & APIs:** OpenAI API, Claude API, machine learning model design, prompt engineering, EmailJS
- **Architecture & Practices:** Clean Architecture, Repository Pattern, REST APIs, Git/GitHub, Agile delivery, technical documentation
- **Data & Visualization:** Power BI, Excel, SAS, SPSS, data cleaning, data wrangling, statistical analysis

PROFESSIONAL EXPERIENCE

IT Intern — Tech Career Accelerator Programme
04/2026 – Present

Capaciti

- Designing and building BizOps AI, an enterprise-grade AI business operations platform, using Angular 18 (frontend), ASP.NET Core/.NET 8 (backend), Microsoft SQL Server and a Python Flask AI microservice with scikit-learn and OpenAI.
- Applied Clean Architecture principles across API, Application, Domain and Infrastructure layers; implemented EF Core with a repository pattern and soft-delete filters.
- Delivered smart ticket classification, user authentication, a dashboard and full ticket CRUD functionality as part of an 8-week incremental build roadmap.
- Produced professional supporting documentation for each project phase, including weekly Word reports, matching PowerPoint decks and a source-derived README.md.

Software Developer Intern
02/2025 – 03/2026

ELO Digital Office

- Assisted in the maintenance and support of company IT infrastructure, troubleshooting hardware, software and network issues for end users.
- Supported end-users via ticketing systems and remote desktop tools, ensuring timely resolution of technical issues.
- Participated in installation and configuration of computers, printers and software applications; documented technical procedures and system configurations to improve the internal knowledge base.
- Collaborated with the IT team on system upgrades, software deployments and cybersecurity initiatives and conducted routine system checks with anomaly reporting.
- Gained hands-on experience with enterprise content management systems and digital document workflows.

Computer Lab Assistant
03/2023 – 11/2024

University of Limpopo

- Provided technical support to students and faculty on software and hardware issues and maintained lab equipment through continuous software updates.
- Collaborated with IT staff to implement new technologies in the lab environment and guided users on effective use of lab resources and software tools.

INDEPENDENT PROJECTS

EduBuddy Predict — Student Performance Prediction System

- Built a weighted composite machine learning scoring model with Predict, Bulk Upload, Dashboard and History features, including CSV preview and dropdown filtering.

SentimentIQ — AI Sentiment Analysis Web App

- Developed a full sentiment analysis application using the Claude API as the NLP engine, supporting single-text and batch CSV analysis with a Chart.js dashboard and session history.

MediGuide — Healthcare Chatbot

- Built a React-based healthcare chatbot applying prompt engineering principles, including structured symptom gathering, emergency escalation logic and diagnosis disclaimers.

Smart Internal Helpdesk System

- Built an AI-powered ticket classification system by department (IT, HR, Finance, Operations) using the Claude API, with a ticket queue, chatbot panel and analytics dashboard.

Personal Portfolio Website

- Designed and deployed a multi-page portfolio (HTML, CSS, JavaScript) on GitHub Pages showcasing AI projects, with a working contact form integrated via EmailJS.

EDUCATION

BSc in Mathematical Sciences — Computer Science and Statistics *06/2024*

University of Limpopo

- Key coursework: Algorithms, Data Structures, Computer Architecture, Computer Networks, Database Systems, Linear Algebra, Advanced Calculus, Regression Analysis, Time Series Analysis, Experimental Design, Sampling Theory, Operating Systems, Artificial Intelligence.

ACADEMIC ACHIEVEMENTS

- Undergraduate Computer Science Group Project: Co-developed an online virtual laboratory web app (JavaScript, HTML, CSS) enabling learners without school lab access to complete Physics and Chemistry practicals.
- Undergraduate Statistics Group Project: Completed a data analysis project using SAS, SPSS and Excel in final year of study.

CERTIFICATIONS

- Machine Learning for Beginners, Coding for Data, Python Intermediate, SQL Intermediate — SoloLearn (2025)
- AI Fundamentals with IBM, Data Analytics Essentials — Cisco Networking Academy (2025)
- Introduction to Python, Introduction to SQL — SoloLearn (2024)
- Introduction to HTML — Simplilearn SkillUp (2023)
- Digital Literacy — Nemisa (2022)
